Siddharth Malhotra

Computer Vision Engineer

Noida, India | siddharth.malhotra.cv@gmail.com | +91 97012 34578 | linkedin.com/in/siddharthmalhotra | github.com/siddharthmalhotra

PROFESSIONAL SUMMARY

Computer Vision Engineer with 4 years of experience building object detection, image segmentation, and video analytics systems for retail and manufacturing clients. Experienced in taking models from research to real-time production deployment.

TECHNICAL SKILLS

Languages: Python, C++

CV/ML Frameworks: PyTorch, OpenCV, TensorFlow, YOLO, Detectron2

Techniques: Object detection, image segmentation, tracking, image augmentation

MLOps/Tools: Docker, NVIDIA TensorRT, Git, ONNX, AWS EC2/GPU instances

PROFESSIONAL EXPERIENCE

Computer Vision Engineer — Visionaire Robotics

Noida, India | May 2022 – Present

- Built a real-time defect-detection system using YOLOv8, achieving 96% precision on manufacturing line footage.
- Optimized model inference with NVIDIA TensorRT, cutting per-frame latency by 55% on edge devices.
- Developed a multi-object tracking pipeline combining detection and Kalman filtering for warehouse inventory monitoring.
- Converted PyTorch models to ONNX for cross-platform deployment across cloud and edge environments.

Machine Learning Engineer — Retinal Analytics

Noida, India | Jun 2020 – Apr 2022

- Built an image segmentation model using U-Net for automated quality inspection in retail shelving images.
- Curated and augmented training datasets, improving model generalization across lighting conditions.

PROJECTS

SmartCount — Retail Footfall Counter | YOLOv8, OpenCV, Deep SORT

- Built a footfall counting system for retail stores using object detection and multi-object tracking.

EDUCATION

M.Tech in Artificial Intelligence — IIIT Delhi

Delhi, India | 2018 – 2020

B.Tech in Electronics and Communication — Amity University

Noida, India | 2014 – 2018

CERTIFICATIONS

DeepLearning.AI Computer Vision Specialization • NVIDIA Deep Learning Institute — Computer Vision
