

Abhinav Joshi

DevOps Engineer — CI/CD & Infrastructure as Code

Indore, India | abhinav.joshi.devops@gmail.com | +91 95123 45624 | linkedin.com/in/abhinavjoshi | github.com/abhinavjoshi

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience specializing in CI/CD pipeline design and Infrastructure as Code using Terraform. Focused on reducing deployment friction, improving release reliability, and enabling teams to ship faster with confidence.

TECHNICAL SKILLS

IaC: Terraform, Terragrunt, Packer

CI/CD: GitHub Actions, GitLab CI, CircleCI

Cloud & Containers: AWS, Docker, Kubernetes

Other: Bash, Python, Vault, Consul

PROFESSIONAL EXPERIENCE

DevOps Engineer — Rapidloop Software

Indore, India | Aug 2022 – Present

- Designed modular Terraform + Terragrunt configurations managing infrastructure across dev, staging, and production environments.
- Built reusable CI/CD pipeline templates in GitHub Actions, adopted across 30+ repositories.
- Reduced average deployment failure rate from 12% to under 3% through automated pre-deployment checks and canary releases.
- Implemented HashiCorp Vault for centralized secrets management, removing hardcoded credentials from codebases.

Junior DevOps Engineer — Buildstack Technologies

Indore, India | Jul 2021 – Jul 2022

- Wrote Terraform scripts to provision AWS resources for internal development environments.
- Set up GitLab CI pipelines for automated builds, tests, and Docker image publishing.

PROJECTS

Reusable CI/CD Pipeline Library | GitHub Actions, Docker, Terraform

- Published a library of reusable GitHub Actions workflows for common build, test, and deploy patterns.

EDUCATION

B.E. in Computer Science — Shri Govindram Seksaria Institute of Technology and Science

Indore, India | 2017 – 2021

CERTIFICATIONS

HashiCorp Certified: Terraform Associate • AWS Certified SysOps Administrator – Associate
