

Priya Deshmukh

Backend Developer — Python & Django

Nagpur, India | priya.deshmukh.dev@gmail.com | +91 97456 12389 | linkedin.com/in/priyadeshmukh | github.com/priyadeshmukh

PROFESSIONAL SUMMARY

Backend Developer with 5 years of experience building secure, scalable web applications and APIs using Python and Django. Skilled in relational database design, third-party integrations, and leading small backend teams through full development lifecycles.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Frameworks: Django, Django REST Framework, Flask, Celery

Databases: PostgreSQL, MySQL, Redis

Tools: Docker, Git, Nginx, AWS (EC2, S3, RDS), Pytest

PROFESSIONAL EXPERIENCE

Backend Developer — AgroChain Solutions

Nagpur, India | Apr 2021 – Present

- Led backend development of a supply-chain tracking platform using Django REST Framework, serving 8,000+ active users.
- Designed normalized PostgreSQL schemas and optimized slow queries, reducing average report generation time by 55%.
- Implemented asynchronous task processing with Celery and Redis for bulk data imports and notifications.
- Integrated payment gateway and SMS/email providers, supporting over 50,000 monthly transactions.
- Containerized the application with Docker and set up CI/CD pipelines, cutting deployment time from hours to minutes.

Software Engineer — Vantage Analytics

Nagpur, India | Jul 2019 – Mar 2021

- Built internal REST APIs with Django for data-reporting dashboards used by 5 business teams.
- Wrote unit and integration tests with Pytest, maintaining over 85% code coverage.

PROJECTS

InvoiceEase — Billing API | Django REST Framework, PostgreSQL, Celery

- Built a multi-tenant invoicing API with scheduled billing reminders via Celery beat.

EDUCATION

B.E. in Computer Science — Rashtrasant Tukadoji Maharaj Nagpur University

Nagpur, India | 2015 – 2019

CERTIFICATIONS

AWS Certified Developer – Associate • Django for Everybody — Coursera
