

Pooja Nambiar

Data Scientist — Machine Learning

Chennai, India | pooja.nambiar.ml@gmail.com | +91 95012 34790 | linkedin.com/in/poojanambiar | github.com/poojanambiar

PROFESSIONAL SUMMARY

Data Scientist with 4 years of experience building predictive machine learning models for e-commerce and healthcare applications. Skilled across the full ML lifecycle, from feature engineering and model selection to communicating results to stakeholders.

TECHNICAL SKILLS

Languages: Python, SQL, R

ML Frameworks: scikit-learn, XGBoost, LightGBM, TensorFlow

Techniques: Feature engineering, classification, regression, hyperparameter tuning

Tools: Jupyter, MLflow, Tableau, Git, AWS Sagemaker

PROFESSIONAL EXPERIENCE

Data Scientist — Careline Health Analytics

Chennai, India | Apr 2022 – Present

- Built a patient readmission risk model using XGBoost, achieving an AUC of 0.87 and supporting clinical intervention planning.
- Engineered 60+ features from electronic health records to improve model predictive power.
- Tuned hyperparameters using Bayesian optimization, improving model F1-score by 9% over baseline.
- Presented model insights and limitations to clinical stakeholders, ensuring responsible deployment.
- Tracked model experiments and versions using MLflow for full reproducibility.

Data Analyst / Junior Data Scientist — Shopgrid E-commerce

Chennai, India | Jun 2020 – Mar 2022

- Built a product-recommendation model using collaborative filtering, increasing average order value by 8%.
- Performed exploratory data analysis and A/B test evaluation for pricing and promotion strategies.

PROJECTS

Loan Default Prediction Model | Python, LightGBM, scikit-learn

- Built a loan default prediction model on public credit data, achieving strong precision-recall balance.

EDUCATION

M.Sc. in Data Science — Indian Institute of Technology Madras

Chennai, India | 2018 – 2020

B.Sc. in Statistics — Loyola College

Chennai, India | 2015 – 2018

CERTIFICATIONS

IBM Machine Learning Professional Certificate • Applied Machine Learning in Python — University of Michigan
