

Devansh Trivedi

LLM Engineer — Generative AI

Pune, India | devansh.trivedi.llm@gmail.com | +91 94012 34801 | linkedin.com/in/devanshtrivedi | github.com/devanshtrivedi

PROFESSIONAL SUMMARY

LLM Engineer with 3 years of experience building applications powered by large language models, including retrieval-augmented generation systems, prompt engineering pipelines, and fine-tuned open-source models. Experienced in taking generative AI features from prototype to production.

TECHNICAL SKILLS

Languages: Python, TypeScript

LLM/GenAI Tools: OpenAI API, Hugging Face Transformers, LangChain, LlamaIndex

Techniques: RAG pipelines, prompt engineering, fine-tuning (LoRA), embeddings

Infra/Tools: Vector databases (Pinecone, FAISS), Docker, FastAPI, AWS

PROFESSIONAL EXPERIENCE

LLM Engineer — Cognivo AI

Pune, India | Jan 2023 – Present

- Built a retrieval-augmented generation (RAG) system using LangChain and Pinecone, powering an internal knowledge-base assistant used by 2,000+ employees.
- Fine-tuned an open-source LLM using LoRA for domain-specific question answering, improving answer relevance by 25%.
- Designed prompt templates and evaluation pipelines to reduce hallucination rates in production responses.
- Deployed LLM-powered APIs with FastAPI and Docker, maintaining sub-2-second average response times.
- Implemented semantic caching for repeated queries, cutting OpenAI API costs by roughly 30%.

Machine Learning Engineer — Wordwise NLP Solutions

Pune, India | Jul 2021 – Dec 2022

- Built text summarization features using transformer models for a document-review product.
- Experimented with embedding-based semantic search to improve internal document retrieval.

PROJECTS

DocuChat — Chat with Your Documents | LangChain, FAISS, OpenAI API, FastAPI

- Built an open-source RAG application allowing users to upload PDFs and ask questions about their content.

EDUCATION

B.Tech in Computer Science and Engineering — College of Engineering Pune

Pune, India | 2017 – 2021
